OBJECTIVE

Passionate and results-driven Computer Science student with a strong foundation in software engineering, machine learning, web development and creative work with photography, videography and cinematography. Experienced in leading media and promotional teams and contributing to innovative projects. Also proficient in a variety of programming languages and frameworks with different languages. Seeking opportunities to leverage my technical expertise and leadership skills in a dynamic environment, contributing to cutting-edge technology solutions. Contributing in the creative team of multinational companies for promotional campaigns also for their advertisement campaigns.

EXPERIENCE

Forward Tech — *Senior Video Creator (Part-Time)*

February 2025 - November 2025

- Make videos which we receive from clients, edit them from up and down wise and share it to them.
- Create motion edit to the light types and combination types of video for clients.
- Make 3D animation.

IEEE NSU Student Branch — *Coordinator of Media TEAM*

March 2025- August 2025

- Lead of the videography team of the IEEE NSU Student Branch's Media Team, making promotional videos for the branch.
- Lead of the photography team of the IEEE NSU Student Branch's Media Team, capturing every moment from events that were organized by IEEE NSU Student Branch.
- Lead of the media team of the IEEE NSU Student Branch's Media Team, for post processing of pictures.
- Engaged promotional Campaign of SPAC 2025 by creating video.

IEEE NSU Student Branch — *In-charge of Media TEAM*

September 2023 - January 2025

- Lead of the videography team of the IEEE NSU Student Branch's Media Team, making promotional videos for the branch.
- Lead of the photography team of the IEEE NSU Student Branch's Media Team, capturing every moment from events that were organized by IEEE NSU Student Branch.
- Lead of the media team of the IEEE NSU Student Branch's Media Team, for post processing of pictures.
- HEAD of media team of [SPAC](#)

IEEE NSU Student Branch — *Core volunteer of Media TEAM*

September 2022 - September 2023

- Lead of the photography team of the IEEE NSU Student Branch's Media Team, capturing every moment from events that were organized by IEEE NSU Student Branch.
- Lead of the media team of the IEEE NSU Student Branch's Media Team, for post processing of pictures.

EDUCATION

North South University, Dhaka, Bangladesh — *Bachelor of Science in Computer Science and Engineering* JUNE 2021 - PRESENT

Ideal College, Dhanmondi, Dhaka, Bangladesh — *Higher Secondary School Certificate*
2018 - 2020

Nabakumar Institution & Dr. Shahidullah College, Dhaka, Bangladesh — *Secondary School Certificate*
2016 - 2018

Govt. Technical High School, Noakhali, Bangladesh — *Junior School Certificate*, 2013 - 2015

SKILLS

Programming Knowledge: Data Structures & Algorithms, Software Design

Programming Language and technologies: HTML, CSS, JavaScript, Python, C/C++, Java, MySQL, PHP, ReactJS, NextJS, JavaScript, TypeScript.

Software Skills: Adobe Photoshop, Lightroom, Illustrator, Premiere Pro, After Effects, Adobe Audition, Davinci Resolve, Blender 3D, Capcut, Photography, Videography, Cinematography, Light Motion, Motion Array types video editing, VFX 2D& 3D.

Soft Skills: Communication, Adaptability, Teamwork, Leadership, Professionalism.

PROJECTS

- **IEEE NSU Student Branch ([Website Link](#)):**
 - Led the front-end development of the IEEE NSU Student Branch website.
 - Enhanced UI/UX using HTML, CSS, and JavaScript, creating a dynamic online platform.
 - Guided junior developers and coordinated tasks within a multidisciplinary team.
 - Implemented innovative solutions to improve website functionality and user engagement.
- **Cricket ScoreBoard ([GitHub Link](#)):**
 - Designed this project using base Java and it's built in regular framework.
 - Enabled users to create an account to use this.
 - Enabled users to store their data and use it afterwards.
- **Physics Chatbot ([GitHub Link](#)):**
 - Developed a chatbot using LLM and SLM.
 - Implemented key features including data retrieval from user's history, store data as per users usage.
 - Enabled users to view what they searched for previously.
 - Users can search and give commands by giving a user-friendly command as the user prefers.
 - Any type of physics related problem can be solved by this model which difficulty level can be easy to medium hard.
 - Used matrix to define precisely for every physics related mathematical problem.
 - Currently working on a project named “ **Data Mined - Identity Matching System and Profile Creation**”, actually a face recognition system where from a high media core person to less media core person can be identified also can be created their BIO by scripting.
- **MindGPT (A mental wellness CHATBOT with a **DYNAMIC** website that includes a proper & best management system for any wellness center or Hospital) ([GITHUB LINK](#))**
 - Developed a chatbot using a multilingual LLM.
 - From Ollama, using gemma3:4b, llama3.2:latest & qwen3b this chatbot has been built.
 - Used RAG for specially context based chat with chatbot.
 - Most user friendly UI for any user.
 - All exception and data handling can be done dynamically.
 - Implemented whole system in dynamic way so that less need to update in future unless new features needed.
 - Used Python's Django in backend as a framework for fast response.
 - Can be used directly in any hospital or mental health wellness institute.
 - Patient-Doctor system also allowed (initially online)(Prescription Service also dynamically available)
 - Currently built in as a web-based system, can be implemented in the App version in future.

- **IdentiFind** (A Knowledge Base-Free Framework for Person Profile Disambiguation and Generation) ([GITHUB LINK](#))
 - Can detect any random person with a realtime face or previous image.
 - It can be used in any social and public safety circumstance.
 - User friendly interface to use it in a short and precise way.
 - Developed profile making system using Key Tech- TensorFlow & PyTorch.
 - Used python selenium code for image scraping.
 - Used automated system to generate a profile person's summary.
 - Can be implemented in commercial use in any company for their employee identification based on the data available in internet.
- **RickShare** ([GITHUB Link](#))
 - A platform for ride sharing. It is most likely similar to UBER & Pathao with implemented some more extra AI features. It is in the building stage now.
- **Personal Coding Agent(Korbi)** ([GITHUB Link](#))
 - Used Deepseek R1 for the brain and complex reasoning.
 - Used LLaVA 7b for Image processing.
 - A Django backend managing dynamic model swapping
 - Also can accept command through voice and reply with voice.
 - Can help for new idea generating.
 - It's 100% offline, 100% private, and 100% free to run.
- **Aqua Sync Smart Water Pump** (A full stack digital twin platform for a smart water pump system and for its company to sell hardware based software subscriptions and one time hardware devices) ([GITHUB LINK](#))
 - Build a completely dynamic end-to-end Admin control panel for overall control.
 - Build a telemetric system so that user can feel the actual live data from their used device.
 - A system provided with a proper flow of activity logs of every profile.
 - Connected the user subscription for each firmware update of the software.
 - Used a typescript real time data collector for the updated data that will receive from the user's purchased hardware device.

Competition

- **Sussex Locomotion Challenge 2023:**

In this competition, we had to analyze human activity using deep learning. Using the CNN framework, we achieved an accuracy of 64%.

AWARDS AND ACHIEVEMENTS

ICCIT 2023 (<https://iccit.org.bd/2023/>)

- Runners Up- 2023, ICCIT Student Activity Video Contest

XIAOMI Global Photography Contest 2024

- Regional Top 50 (Out of 1.5M regional Contestant)
- Bangladesh Top 10

Nikon Film and Photo Contest 2022-2023

(https://www.nikon.com/company/news/2023/0921_npc_01.html)

- Regional Top 100
- Bangladesh's 3rd

Online Coding Competitions

- Codeforce Rating: 1752 (max)
